CONTENTS

Section 1. NEW TECHNOLOGIES OF FOOD PRODUCTS

Cherevko O., Krutovyi G., Zaparenko G., Borysova A. The problems of creating therapeutic nutrition systems of second generation

Pavlyuk R., Pogarskaya V., Matsipura T., Kys V. Studying the processes of cryogenic mechanical chemistry of high- and low-molecular nano complexes in champignons during their cryo processing with the use of liquid nitrogen

Pavlyuk R., Pogarskaya V., Radchenko L., Sokolova L., Yurieva O., Berestovaya A. Studying content of biologically active supplements in natural herbal spices – additives for healthful products

Pavlyuk R., Pogarskaya V., Abramova T., Berestovaya A., Toporkova N. Technology tonic nanodrinks based of milk whey enriched by vegetable cryogenic paste and phytoextracts

Kondratjuk N., Bolshakova V., Pyvovarov Y., Pyvovarov P. Analysis approach to modeling stable food systems with lactobacillus acidophilus

Yancheva M. Innovations in the technologies of meat semi-products

Botshtein B., Chernaya N. Improvement of the technology of mixedspirit-containing beverages with the use of structuring agent

Dukareva G., Sokolovska O. Technological parameters of the developed pastille products

Stepankova G. Technologies of wheat bread with the use of oat and maize germ products

Section 2. EQUIPMENT OF FOOD PRODUCTION ENTERPRISES AND IMPROVEMENT OF PROCESSES AND APPARATUSES OF FOOD PRODUCTION ENTERPRISES

Cherevko A., Mykhailov V., Mayak O., Sardarov A. The effect of vibration on the process of vacuum drying of vegetable raw materials

Cherevko A., Skrypnyk V., Fariseev A. Heat transfer in the surface layer of the meat products at bilateral frying under conditions of compression

Deynichenko G., Mazniak Z., Guzenko V. Analytical characteristics of membrane treatment of liquid high molecular systems

Deynichenko G., Tereshkin O., Gorelkov D., Shevchenko I. Investigation of the processes of a combined method of cleaning pumpkin fruits
Pogozhikh M., Chekanov M., Pak A. Improving energy efficiency concept in food production process ........................................

Yakovlev O., Postnov G., Potapov V. Effect of ultrasonic waves to change mass transfer coefficients at salted fish ............

Potapov V., Yakusheenko E. Effect of design of internal heater on the drying kinetics of grape pomace in mass transfer module ....

Tormosov Y., Saenko S. Simulation of the propagation of heat rays of segment reflector ..........................................................

Zakharenko V., Sorokina S. To the calculation of energetic luminosity of food products at IR-heating..........................

Tereshkin O., Gorelkov D., Afukova N., Melnik K. Development of resource saving method of cleaning garlic and promising ways of developing its hardware design..........................................................

Savchenko-Pererva M., Yakuba A. Calculation of velocity field in cylindrical device with a counter-swirling flows based on experiments..........................................................

Tokolov Y., Gurskiy P., Bogomolov O., Domnich M. Research of the dependence of flour extraction on frequency of working organs rotation in grinding down module..........................................................

Postnov G., Tereshkin O., Dmitrevskyi D., Vasylets I. Research of the influence of thermal steaming on the surface layer of onion.....

Section 3. IMPROVEMENT OF FOOD PRODUCTS QUALITY

Shidakova-Kamenyuka E., Golovko N., Rogovyi I., Rogovaya A. The use of qualimetry principles for the evaluation of the quality of biscuits with the addition of semi-finished nutritive bone product ......

Golovko M., Primenko V., Golovko T. Determination of the acute toxicity parameters of biologically active additive «Sivoselen Plus»..

Krutovy G., Zaparenko G., Zakharenko V., Borysova A. Analysis of the biological value of unconventional floury products.............

Odarchenko A., Gasay Ye., Karpenko Z. Prospects for enrichment kefir with wheat germ ..........................................................

Yastreba Y., Pasichniy V. Improvement of the technology of meat minced products using hydrocolloids..........................

Samokhvalova O., Kasabova K. The use microbial polysaccharide xampan for raising muffins quality on the grounds of wheat germ extraction..........................................................

Odarchenko M., Karpenko Z, Sergienko A., Bobyreva A. Muchka in fermented beverages ..........................................................
Section 4. CHEMICAL, PHYSICAL, MATHEMATICAL METHODS OF RESEARCH OF FOOD PRODUCTS QUALITY

Tsykhanovska I., Barsova Z., Demidov I., Pavlotskaya L.
Investigation of the oxidative and thermal transformations processes in the system «oil – lipids-magnetite suspension»

Orlova N., Dyakova Yu., Romanenko R. Structural-mechanical properties of aubergine snacks

Kuzmin O., Topol'nik V., Mironchuk V., Sujkov S. Stabilization of aqueous-alcoholic mixtures under the process of electrochemical activation of drinking water

Demidova A., Aksenova O., Demidov I. Determination of the sunflower oil storage period by the accelerated method

Kravchenko M., Yaroshenko N. Technology of gingerbread products fortified with sesame the cedar schrot

Tokar A., Myroniuk S. Preservation of eggplant fruit at their treatment with antimicrobial effect substances

Sukmanov V., Petrov Y., Zaharevich V., Marinin A. Subcritical water as extractant in the process of extraction of biologically active substances from plant material

Obozna M., Lyubenko G., Pertevoy F. Investigation of fatty acid composition of thermoduric milk-containing filling with sesame seeds concentrate
Iukuridze E. Current methods of study and identification of origin wines...

Ditrich I., Marchenko Y. Quality evaluation of new fish preserves in «Neptune Cherry» sauce ..........................................................

Kushnir N. Determination of the balance of amino acid structure of collageneic preparation ........................................................................

Kostenko E., Maksimenko E., Butenko E. Determination of microelement food additive «Hibiscus» using methods of solid spectrophotometry ........................................................................

Section 5. COMMODITY RESEARCH AND EXPERTISE OF NON-FOOD PRODUCTS

Zakharenko V., Diakov A., Vorontsova Zh. Renewal of pores distribution in leather products ........................................

Letuta T., Gasanova A., Grygorets D. The influence of aesthetic properties of product packaging on consumers, preferences ........

Golovko T., Bakirov M. Jewels in the mineral resources Ukraine ............

Section 6. INFORMATION TECHNOLOGIES IN SCIENCE AND EDUCATIONAL PROCESS

Gubsky S., Vinnikova V., Kobrin V. Organization of network interaction in educational process ..........................

Chagovets V. The problem of forming information-learning environment of the university ................................................

Girinova L., Sybiryakova I. Using cloud service IBM ARCA for scientific research in universities ..........................
