Section 1. NEW TECHNOLOGIES OF FOOD PRODUCTS

Pavlyuk R., Pogarska V., Maximova N., Balabai K., Loseva S., Kotyuk T.
The carotenoid «Sunroll» buns vitaminized by natural nanoadditives for healthful nutrition ........................................ 7

Pogarska V., Mykhailov V., Poharskii O., Balabai K., Kakadii I.
Stukonozhenko T. Natural healthful fruit and vegetable nanobeverages with a record amount of BAS for enterprises of restaurant business, tourism and fitness .............. 21

Pavlyuk R., Pogarska V., Tauber R., Pavlyuk V., Jasiurkowska M.
Sensational facts and the discovery of hidden forms of protein in mushrooms during the obtaining of nanoproducts in an easily digestible form ................................................................. 37

Snezhkin Yu., Husarova O. The determination of optimal modes of apples drying in the production of fruit crisps ........................................ 55

Neklesa O., Yarantseva Ye., Pyvovarov P., Vovk V., Kostugov K.
Determination of water-consistent ability of food systems based on sodium alginate and polysaccharides ........................................ 64

Kramarenko D., Hirenko N., Dub V. Research of emulsifying characteristics of additives of hydrobionts................................. 77

Kondratjuk N., Pyvovarov Y., Padalka A., Polyvanov Y.
Rheological properties of food film-forming gels on the basis of uroconate polysaccharides ......................................................... 86

Bozhko N., Tishchenko V., Pasichnyi V., Miz E. Development of sausages from the musk duck meat ........................................ 94

Odarchenko D., Sokolova E., Aksonova O., Ababova A.
Determination of safety indicators of frozen fruit semi-finished products for the production of smoothies ................................. 104

Dzyuba N., Valevskaya L., Kalugina I. Assessment of the competitiveness of the «Bulbashka» fantastic confectionery .... 116

Zamorska I. Quality and cryoresistance of frozen strawberries pretreated in the solutions with structure-maintaining properties ...... 129

Section 2. EQUIPMENT OF FOOD PRODUCTION ENTERPRISES AND IMPROVEMENT OF PROCESSES AND APPARATUSES OF FOOD PRODUCTION ENTERPRISES

Deynichenko G., Guzenko V., Melnik O., Perekrest V. Development of energy efficient equipment for drying hydrobionts (non-fish products of the sea) ................................................................. 137
Kiptela L., Zahorulko A., Zagorulko A., Liashenko B.
Development of universal IR-dryer of organic natural raw material .. 147

Potapov V., Petrenko O., Semeniuk D., Bilyi D. Constructive features of transcritical booster refrigeration systems .................. 156

Deynichenko G., Guzenko V., Mazniak Z., Udovenko O., Omelchenko O.
Creation of resource-saving equipment for the extraction of plant raw materials .................................................................................. 168

Potapov V., Yakusheenko E., Stoyan E. Mass exchange module for the implementation of the process of vegetable raw material drying ........................................................................................................... 178

Postnov G., Chervonyi V., Chelombitko V., Postnova O.
Improvement of the method of obtaining water-fat emulsions for lubricating baking molds ............................................................................................................................ 186

Mayak O., Sardarov A., Shershnev G. Study of heating in the processes of manufacturing separate concentrates from plant raw material .............................................................................................. 193

Afukova N., Dmytrevskyi D., Horielkov D., Bondarenko R.
Improvement of the combined process of Jerusalem artichoke cleaning .................................................................................................................. 201

Samoichuk K. Acceleration of emulsion as a basic factor of hydrodynamic dispergating of milk fat phase ................................. 210

Mykhailov V., Shevchenko A., Udovikova S., Gaydar N. Creation of the newest structures of the inclined bucket elevators through the modernization of the existing ones ............................................. 221

Myroshnichenko K., Batrachenko O. Rheological properties of the main types of minced meat processed into emulsifier ............ 234

Section 3. IMPROVEMENT OF FOOD PRODUCTS QUALITY

Cherevko O., Krutovyi G., Zaparenko G., Lukyanchyk P., Borysova A.
Provision of the nutrition diversity in durable nutrition system and cyclic diet creation .................................................................................................................. 241

Tsykhanovska I., Demidov I., Alexandrov A., Gontar T., Pavlotska L. Study of biologically active additive impact on lipids oxidation processes .. 251

Onishchenko V., Seljutina G., Dromenko O., Onishchenko A.
Research of quantitative and qualitative indicators in the technology of offal fried sausages .................................................. 263

Kamsulina N., Murykina N., Budarina A., Pohoriev M., Bondarenko P.
The study of hydrocolloid mixtures’ functional properties ............... 271

Koltunov V., Kalaida K. The speed of cooling sweet pepper fruit of technical stages of maturity .................................................. 284

Gumeniuk O., Gorodyska O., Kseniuk M. Semi-finished biscuit of high nutritional value with the addition of flaxseed meal .......... 292
Rubanka K., Terletskaya V., Abramova A. Investigation of quality of dry extract root of ginger ........................................ 301

Section 4. CHEMICAL, PHYSICAL, MATHEMATICAL METHODS OF RESEARCH OF FOOD PRODUCTS QUALITY

Cherevko O., Krutovyi G., Zaparenko G., Movenko S., Borysova A. Two-stage filtration of the diets of disposable consumption for development of dietary systems ........................................ 311

Mikhaylov V., Babkina I., Shevchenko A., Prasol S., Yalinich S. Evaluation of quality indicators of products produced under the conditions of IR-heating in gas environment ..................... 322

Tormosov U., Stoyan E., Yakushenko E. An approximate method for finding of a functional extremum on the set of permutations........ 334

Evlash V., Kuznetsova T., Zheleznjak Z. Study of interaction of gelatine and vitamin C in model systems.......................... 345

Kiptela L., Zahorulko A., Zagorulko A., Liashenko B. Analysis of disadvantages of the existing methods of determining food products quality by color ......................................................... 354

Section 5. COMMODITY RESEARCH AND EXPERTISE OF NON-FOOD PRODUCTS

Zakharenko V., Sorokina S., Akmen V. To the question of determining natural leather electrical conductivity.......................... 364

Dubinina A., Sherbakova T., Khatskevych Yu., Lenert S., Borysova A. Technological factors impact on the color of plant raw material........... 374

Dyukareva G., Romanyuk A. Peculiarities of preliminary documentary control and expertise of pastila in the foreign economic operations ................................................................. 391

Section 6. INFORMATION TECHNOLOGIES IN SCIENCE AND EDUCATIONAL PROCESS

Chagovets V., Chagovets M. Implementation of innovative approaches to learning with the use of information and communication technologies ......................................................... 408

Alphabetical index ........................................................................ 418
Requirements for the articles .......................................................... 427
