CONTENTS

Section 1. NEW TECHNOLOGIES OF FOOD PRODUCTS

Pavlyuk R., Pogarskaya V., Kotuyk T., Dudnyk E., Pogarskyi A., Loseva S. Development of natural nanoproducts from bean and spicy vegetables for restaurant business enterprises for healthy food ................................................................. 7
Deynichenko G., Guzenko V., Melnik O., Sheina A. Intensification of the process of ultraphiltration of defective milk ........................................ 22
Grynchenko N., Tyutyukova D. Investigation of skimmed milk influence on physical and chemical properties of cottage cheese ........ 31
Pertsevoi F., Bidyuk D., Duschenok D. Investigation of the influence of technological parameters of obtaining gels on the basis of animal proteins on their structural-mechanical properties ............. 43
Pavlyuk R., Pogarskaya V., Mikhaylov V., Pogarskyi A., Telenkov A., Loseva S. Determination of the BAR complex of chlorophyll containing vegetables and development of nanotechnologies of food for healthy food............................................. 55
Pogarska V., Pavlyuk R., Kakadii I., Pogarskyi A., Stukonozhenko T., Telenkov A. A new word about the effect of steam-thermal and cryogenic treatment and mechanolysis on biopolimers and BAR fruits and vegetables during the obtaining of healthful nanoproducts ........ 78
Dorochovych A., Mazur L., Gubsky S., Evlash V. Technology of candy caramel with dietary-functional properties ...... 96
Bozhko N., Tishchenko V., Pasichniy V., Verteleckaja N. Development of sausages from the peking duck meat ......................................................... 112
Pertzevoy F., Bidyuk D., Koshel O. Analytical substantiation and choice of binary combination of polysaccharides for thermostenic milk-containing stuffing ......................................................... 122
Pogarska V., Pavlyuk R., Dudnyk E., Kotuyk T., Pogarskyi A. Innovative technologies of healthy sauces-dressings with the use of cryoadditives from spicy vegetables without synthetic components ......................................................... 134
Husarova O. Influence of different types blanching apples on drying process for crisps production .......................................................... 147
Botstein B., Chorna N. Development of the technology of coffee beverages with new structural properties ...................... 157
Kapustian A. Research of lysis of lactic acid bacteria cells under the action of proteolytic enzymes ........................................ 168
Section 2. EQUIPMENT OF FOOD PRODUCTION ENTERPRISES AND IMPROVEMENT OF PROCESSES AND APPARATUSES OF FOOD PRODUCTION ENTERPRISES

Mikhaylov V., Shevchenko A., Babkina I., Prasol S., Babanov I.
Investigation of electrical indicators and kinetics of temperature during electro-contact processing of semi-finished products ............ 179

Deynichenko G., Guzenko V., Maziak Z., Udovenko O., Omelchenko A.
Creation of resource-saving equipment for the membrane treatment of food liquids .......................................................... 189

Potapov V., Kostenko S. Simulation modeling of temperature kinetics of infrared frying of meat semi-finished products .................. 197

Mikhaylov V., Udovikova S., Chuiko L., Gaidar N., Borysova A., Zhdanovich O., Golovanova S. Material particle movement in a bucket with moving bottom of semi-circular shape .............. 205

Lebedynets I. Methods of constructing actuating mechanisms for weighing-and-packing machines and food production automatics .................................................................................. 224

Pazyuk V., Petrova Z., Dub V. Modern state of the problems of enhancing energy efficiency of the process of grain seeds drying .. 231

Sheyina A., Khorolsky V. Method of investigating quality of cutting vegetable raw materials and determination of the factors of influence ................................................................. 243

Section 3. IMPROVEMENT OF FOOD PRODUCTS QUALITY

Ovsyannikova L., Valevskaya L., Grishchuk Y., Evdokimova G.
Influence of storage conditions on changes in the quality of new sorts of flax ........................................................................... 255

Shidakova-Kamenyuka E., Novik A., Rogovaya A., Savenko A.
Evaluation of the influence of nutty oil meal on the quality of butter biscuits during storage ....................................................... 268

Zhygunov D., Kovalova V. Improving baking quality of wheat flour ............................................................................................... 280

Korzun V., Antonyuk I. Research of the quality of biscuit cake «Charm» with the enhanced biological value ........................................ 292

Cheliabiieva V., Sizaya O., Savchenko O. Getting pectin from squash currant to make marshmallows on the basis of gooseberries .......... 303

Chuiko M. Study of toffee quality indicators with the addition of non-traditional vegetative raw materials .......... 317
Grushetskiy R., Grinenko I., Khomichak L. Dietary supplement «Inulin with momordica charantia» ........................................325

Section 4. CHEMICAL, PHYSICAL, MATHEMATICAL METHODS OF RESEARCH OF FOOD PRODUCTS QUALITY

Pogozhikh M., Torianik D. Determination of physical properties of the mixture in technological processes ........................................333

Ponomarova S., Iurchenko V., Aksonova O. Dispersion of fine dust from confectionery factory outside its sanitary protection zone.........................................................344

Section 5. COMMODITY RESEARCH AND EXPERTISE OF NON-FOOD PRODUCTS

Golovko N., Polupan V., Kolesnik V., Polupan Ya., Senatosenko A. Scientific substantiation of recipeural composition and improvement of consumer properties of liquid soap-scrub ........356

Dyukareva G., Pavlenko I. Order and peculiarities of the customs clearance and expertise of foreign-made gas-powered strimmers during the displacement across the customs border of Ukraine in the regime «Import» .................................................................364

Alphabetical index .........................................................................................378
Requirements for the articles ........................................................................386
